Charlevoix County Herald.

Vol. 28 EAST JORDAN, MICHIGAN, FRIDAY, JUNE 27, 1924. No. 26

Bay City K. C.'s Defeated 3 to 1

DeLoof Allows Only Three Hits; Strike Out Six.

East Jordan won another baseball game last Sunday at the Fair Grounds, defeating the fast Bay City K. C. team 3 to 1. DeLoof pitched a great game, holding the visitors to 3 hits and striking out 6 men. Outside of the 3 hits only 2 balls were hit out of the infield, Sam Kamradt and LaLonde each taking care of one fly. Hank Kamradt caught his usual good game, none of the visitors attempting to steal on him. Dietrick made a fine catch in the third inning, starting a double play. He also scored 2 of East Jordan's runs. Ward and Hank Kamradt each made 2 hits.

The home team wasted no time in putting a run across the plate. In the first inning Dietrick singled to left and took third on Hank Kamradt's single. On the double steal Dietrick crossed the plate while H. Kamradt was stealing second. After two were out in the third, Ward singled but was unable to advance as H. Kamradt flied to Ducharme.

Sam Kamradt opened the fourth with a single and was sacrificed to second by DeLoof. He could not get any nearer the plate as the next two batters were out on grounders. We were more successful in the fifth, after two were out Dietrick was safe on Butlers error. Ward singled to right and by some fast sprinting Dietrick scored from first on the hit, Ward taking second on the throw to the plate. Hank Kamradt singled to left, Ward attempted to score but was thrown out F. Regan to Ramm. East Jordan's third run was scored in the sixth. Sam Kamradt opened the inning with a terrific drive to center that looked good for three bases but Callahan caught it after a hard run. DeLoof waited out a base on balls and Covey crossed up the Bay City infield with a safe bunt DeLoof going to third Morgan drove a long fly to St. Pierre, DeLoof scoring after the catch.

The K. C.'s had two men on bases in the first inning but were unable to score. T. Regan flied to LaLonde, Ducharme singled to right and took third on Ebere's single to the same spot. F. Regan grounded to Covey whose throw retired Ducharme at the plate. Callahan ended the inning by striking out. T. Regan was passed in the third but was forced at second by Ducharme. Dietrick pulled down Ebere's liner and doubled Ducharme off first. After two were out in the sixth F. Regan reached reached first on an error. Callahan ran the count up to 2 and 3 and then doubled to left scoring Regan. This was the only hit that Bay City made after the first inning.

The Bay City Kay Sees team is one of the fastest teams that has played at East Jordan and the game was interesting at all times.

Summary—Two base hit Callahan. Sacrifice hits, DeLoof Neering. Sacrifice fly Morgan. Struck out by DeLoof 6, by Ebere 3. Bases on balls off DeLoof 5, off Ebere 2. Double play Diedrick to Ward. Umpire—Gothro.

The Northern Michigan Resort League season opens next Sunday, June 29th. Boyne City plays at East Jordan. East Jordan will present the usual lineup supplemented by Jack Gunderson. The Boyne City team has been strengthened with Krueger, a pitcher from Saginaw, McDonald who has been pitching for Alma College and Cody and Mellencamp infielders. Saffron, Bradley, Manglos, Coblentz and McNally of last year's team are in the lineup. Game called at 2:30 p. m.

Manager Parks has arranged a five game series with the fast Traverse City Independents, who are leading the West Michigan Resort League, having won 5 games, lost none. The first game will be played at Traverse City next Saturday at 3:00 p. m. The secodd game will be played at East Jordan. Date to be announced later, probably sometime during the second week in July.

Rigley, the Olivet College catcher and classed as all M. I. A. A. catcher the past 3 seasons will report Friday night for duty the balance of the season.

Mulla DeLoof practiced with the Cleveland American League team at Detroit last Saturday, having received a wire from Manager Tris Speaker of the Cleveland team to report for a try out.

Manager Speaker told DeLoof that he would use him at shortstop in some games during the last month of the league season, but probably not until after the base ball season here closes.

Jack Gunderson who has been pitching great ball for Western State Normal team this spring defeating such strong teams as Notre Dame University Michigan Agricultural College, Beloit College and Ypsilanti Normal School, will be back in the East Jordan lineup next Sunday. Jack turned down several league offers to play with East Jordan.

Jack Gunderson was the premier pitcher of the Western Normal squad this year and there are fans aplenty around Kalamazoo who are certain he was the best college pitcher in the state during the season just closed.

Whenever Kalamazoo Normal had an unusual foe the East Jordan boy was the choice of Coach Hyames to go in and hang up a win. And he never failed. Only two games out of fourteen played were lost by the Normal, but in none of Gunderson's games was the day hardly in danger.

One of Jack's prettiest exhibitions was against Notre Dame at Kalamazoo a few weeks ago. Notre Dame was using the pitcher that had set back the University of Michigan and other big universities, but the boy from Northern Michigan had a clear edge and Gunderson's men won, 2 to 1.

Gunderson played chiefly in the outfield until this year, because Coach Hyames had an abundance of mound men and could't afford to spoil a .400 hitter. But this year Gunderson played both, going to the garden in most games that he didn't pitch, and he was the king pin of the Normal diamond from start to finish.

Included in a resume of the baseball season in the current issue of the Western Normal Herald is the following:

"John Gunderson—Jack, the diminutive southpaw of the squad, is recognized as the pitching ace. When he did not pitch, he usually meandered about right field. He was one of the great contributing factors in the success of the season that has just closed. His batting ability was also a feature that caused heart failure to many opponents."

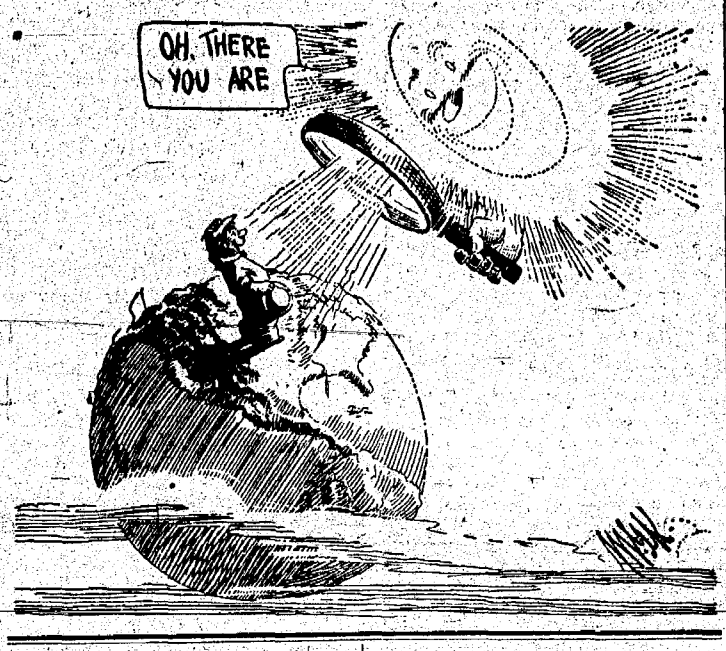

COUNTY ODDFELLOWS BENEFIT ASSOCIATION ELECT OFFICERS

At the annual meeting of the Charlevoix County Odd Fellows Mutual Benefit Association held at Boyne City Saturday evening the following officers were elected.

President—Newton Jones, East Jordan
Vice President—Eugene E. Stroud, Horton Bay
Secretary—Ed. J. Davis, Boyne City
Treasurer—Leo D. Wilson, Boyne City
Directors—Herbert E. Gould, Boyne City, 3 years
John Bugbee, Charlevoix, 3 years
Isaac Bowen, East Jordan, 3 years.
Joe Montroy, East Jordan, 2 years to fill vacancy
Lee Sneathen, Horton Bay, 3 years.

Watch your dollars and you won't have to worry about your dimes.

CITY TAX NOTICE

City Taxes for the City of East Jordan for the year 1924 are due and payable at my office during the month of July without penalty.

G. E. BOSWELL,
City Treasurer.

A very poor man likes to think that all the rich are very unhappy.

Free! Free!

The Temple Theatre will present to each purchaser of an admission ticket to their motion picture entertainment this Saturday evening, June 28th, a genuine 100,000 German Mark Note. These bank notes were issued by Reichsbank of Berlin and had a prewar value of $25,000.

Be sure and be present this Saturday night and get one of these souvenirs.

Political Announcement

I respectfully submit to the Republican Electors of Charlevoix County that I am a Candidate for nomination at the September Primary for the office of Register of Deeds.

25 t.f. DARWIN F. MEECH.

Political Announcement

To the Electors of Charlevoix County:

This is to announce my candidacy for County Treasurer on the Republican Ticket at the Primaries in September. I am at present Deputy County Treasurer, and have had personal charge of the office during the illness of Henry C. Cooper, having thereby become familiar with the work. Your support will be appreciated at the September Primary.

25-3 MARY A. COOPER.

Notice to Water Users.

Sprinkling hours are fixed by ordinance from 6:00 to 8:00 o'clock a. m., and from 6:00 to 8:00 o'clock p. m.

Those violating this rule are subject to having city water shut off from their premises.

OTIS J. SMITH,
City Clerk.

By order of the City Council.

A seasoned wife knows she needn't worry much his health until he ceases to care what he has for dinner.

Most men who are really prosperous pretend to be hard up in order to keep others from selling them things they don't want.

Candidate Dawes and His Family

This picture of Charles G. Dawes and his family was made at his home in Evanston, Ill. Left to right—Dana Dawes; Mrs. Melvin B. Ericson, daughter; General Dawes, Mrs. Dawes with Virginia; Melvin B. Ericson, son-in-law.

Exchange Mail With Boyne City

New Service Brings Two Cities In Closer Connection.

Through the efforts of Postmasters W. A. Stroebel of East Jordan and J. R. Dean of Boyne City an exchange of mail has been arranged between the two cities that brings them in closer contact.

Hereafter all mail destined for Boyne City and deposited after noon will be placed in a closed pouch and leaves the East Jordan postoffice at 7:30 a. m., via rural route No. 4. This mail will be taken to Afton, where a large-sized steel mail box is placed, and will be taken up by the Boyne City-R. F. D. carrier No. 1.

Owing to error, small boxes were sent by the postoffice department. As soon as the large boxes are received, mail from Boyne City to East Jordan will be taken out by the Boyne City rural carrier No. 1 and placed near Advance where East Jordan carrier No. 2 will pick up and return to East Jordan.

The East Jordan to Boyne City exchange became effective last Saturday.

The Ragweed And Weeds In General

A Discussion by the Agr. Dep't. in Co-operation With the East Jordan Study Club.

The Ragweed (ambrosia artemisiifolia) is a plant most commonly found in cultivated crops or in places fairly free from vegetation. It is a tall coarse plant with an erectfiberous stem, growing to the height of two or three feet and sometimes more. It has flat spreading leaves, which are much divided and present a feathery appearance. It is a diecious plant having its staminate flowers at the tips and its pistillate flowers in the leaf axils.

The Ragweed is called a weed because it is a plant out of place and its growth is detrimental to cultivate crops. It is probably most often found in corn or potato fields, it seems to be crowded out by the grass crops or fast growing small grains.

The Ragweed reproduces by means of seed so that its extermination should be easier than such plants or rather weeds as the Canada thistle or quack grass. The rules which would apply to the extermination of the ragweed apply to all weeds and those which follow will give some idea of the size and scope of such a project.

1. A sharp hoe in energetic hands.
2. See that all farm and garden seed is free from weed seed.
3. Strive to prevent weeds from ripening their seeds.
4. Modify the roatation of crops where necessary.
5. Make a specialty of cultivated crops and keep them clean.
6. Cultivate after a crop is removed.
7. Clean fence rows and breeding places rather than leave them to produce more weeds.
8. Continue this work from year to year and each year the work will be less.

Some of the more important ways in which weeds are spread are, by livestock, barnyard manure, threshing machines, streams, open ditches, and by the wind, as many seeds have appendages which make them easily carried. There are many other ways but these without doubt constitute the most important ones.

Weeds are pests, why? Because they do the following things:

1. They rob useful plants of moisture and plant food.
2. They injure crops by crowding and shading.
3. They increase draft and wear on machinery.
4. They retard the curing and drying of hay.
5. Some injure dairy products and the quality of meat.
6. Some are poisonous and injurious to the health of animals.

At the time that Michigan became a state there were about 35 different kinds of weeds within its borders. Today there are more than 250 different kinds and there is a promise of more. Some come from other States, some from foreign countries and some are produced by the crossing of different species.

A concerted action carried on over a period of years in which all owners and renters of real estate co-operated would without doubt greatly reduce this number.

Mrs. Clyde Hipp Passes Away

At Her Home In This City After Year's Illness.

Mrs. Clyde W. Hipp passed away at her home in this city Saturday last, June 21st, following a year's illness from Cancer. She was confined to her bed for the past six months.

Anna Phillipen Lenhard was born at Formosa, Ont., Nov. 5th, 1878, her parents being Louis and Margaret Lenhard. She came to Michigan in 1880 with her parents, locating in Gagetown.

On Oct. 25th, 1903, she was united in marriage to Clyde W. Hipp of East Jordan at Gagetown, Mich., and has since made this city her home.

Mrs. Hipp is survived by her husband, and two daughters—Leone and Vera. Also by the following brothers and sisters:—John P. Lenhard of Frankfort, Mich.; Clem of Saginaw; George of Detroit; Frank and Joseph of Gagetown; Mrs. Catherine Rocheleau of Gagetown; Mrs. Elizabeth Secoir of Battle Creek; and Mrs. John Weiler of Gagetown.

Deceased was a member of St. Joseph's Catholic Church and in fraternal orders was a member of the Lady Maccabees.

Funeral services were held Tuesday, June 24th, at 9:00 a. m., conducted by Rev. Fr. D. M. Drinan. Interment at Sunset Hill.

FORD CAR NO. 10,000,000

With Ford Car No. 10,000,000 now in service and making a trans-continental trip from New York to Chicago over the Lincoln highway, the man who enjoys figuring can have a world of practice.

The other day one gifted gentleman worked out the tire problem. He figured that the 40 million tires used on the ten million Fords, if stacked up would make a rubber column, 2,000 miles high.

Then, looking for road trouble, he punctured each of the tires, and then figured that one man working eight hours a day except Sundays and holidays and repairing a tire every five minutes would finally finish the job in 400 years.

Card of Thanks

We wish to thank all those who in any way lent aid and comfort during the illness and death of our wife, mother and sister. Also for the beautiful floral offerings.

Clyde Hipp and Family.
The Lenhard Family

Women who wouldn't think of consulting a horse doctor if they were ill, don't hesitate to permit ignorant or careless nurses to rear their children.

Goldwyn presents The Charles Brabin production

The Why of Superstitions

By H. IRVING KING

CABBAGES AND LOVE

IN MANY parts of the country a girl who is becoming anxious about her prospects of matrimony goes out to a neighbor's cabbage patch at night, steals a cabbage and places it over the house door. The man upon whom the cabbage falls when the door is opened is the man she is destined to marry. It is held by most authorities that this charm can only be worked with success upon Allhallowe'en and that the girl should go through a graveyard on her way to steal the cabbage. In some sections it is believed that something of the physical characteristics of the girl's future husband can be divined by the shape and size of the cabbage stolen. In no case can she select the cabbage but must take the first that comes to hand—some say pull it with her eyes shut.

In Scotland the same superstition is a common Hallowe'en custom, handed down from time immemoral, and was glorified in poetry by Robert Burns. Only in Scotland they do not put the whole cabbage but only the stalk over the door and say that the amount of earth clinging to the cabbage root indicates the size of the fortune the girl's husband will have. This superstition is inherited from our barbarous ancestors of northern Europe to whom cabbage and kale were nearly what onions and garlic were to the Egyptians. Egyptians even deified the onion and if the Teuton and the Celt did not exactly deify the cabbage they held it in high respect as possessing many mystic qualities and gave it a place only a little lower than the grain god. Most appropriate vegetable to divine by.

ROMANCE OF WORDS

"MELODRAMA"

NOWADAYS, if a theatrical producer were to advertise a "melodrama" and then produce what is commonly known as an operetta or play in which spoken lines alternate with songs, it is probable that the public would enter a strong protest, claiming that the producer was guilty of misrepresentation. But that the manager's announcement would be correct may be seen by an examination of the term—a compound of the Greek words melos, a song, and drama, a play or action.

The early melodramas were, therefore, plays in which music was introduced, either as an additional entertainment or as a means of further explaining the progress of the production. When the Italian school produced "operas" the word "melodrama" was gradually pushed into the background—to be revived at a later date in connection with the plays of a tense, exciting nature. In these, it was customary to use an orchestration filled with music of a suggestive, creepy variety, certain strains being indicative of the entrance of the villain, others of the hero, the heroine, the love scenes, the struggles and the like. In the modern school of theatrical production these artificial aids have been discarded to a great extent, but the name melodrama continues as evidence of the fact that the music was once there.

SUNDAY STORY

WITCH TEG'S SON

YACO, the son of old Witch Teg, who lived on the mountain side, wanted to be rich. He did not want to live in a cave with his Witch Mother, though she did everything within the power of her magic arm to make him happy.

It was not, however, in the power of Witch Teg to give gold to her son, or to any one else.

Stones she could change into animals or mountains into rocks and trees, and it was whispered she had changed more than one into the shape of a wild animal.

So when her son asked for gold that he might become rich and live in a

"Soon I'll Be a Rich Man, Mother," He Said.

palace Witch Teg knew she could not grant his wish.

There was one thing she could do, and that was to help him get money, and this she did by changing the big rocks around her mountain cave into fat pigs which Yaco drove to the market and sold for gold.

Soon the gold began to pile up in the corner of the cave, for Yaco's pigs were the finest in the market and brought the highest prices.

"Soon I will be a rich man, mother," said Yaco one day, "and I shall live in a palace, and when you see me riding in my coach with four prancing horses you will be proud of your son."

Witch Teg listened with downcast eyes, for she began to understand that this selfish son had no thought of her, but would leave her as soon as he was rich enough to satisfy his greed.

If Yaco had seen his mother's eyes his answer to her question would perhaps have been more guarded, but he didn't, and so when Witch Teg asked, "And how shall I be able to see so fine a person as you will be when you drive out in such style? You cannot drive up the side of the mountain."

"Oh, you can sit at the foot of the mountain some day and I will drive past," replied the ungrateful Yaco. "You will not expect me to notice you, of course, for I could not have a witch for my mother, you know, and live in a palace."

"No, no," answered the witch, "that would never do." But she did not intend that her selfish son should leave her to live in a cave while he rode about in a beautiful coach ashamed to own her for his mother.

One morning when Yaco started for market the pigs he drove before him were the plumpest and finest he had ever driven down the mountain and Yaco thought of the gold he would bring back to add to his store.

Yaco did not know that his mother, before the sun was up and while the mountain was yet misty in the early morning, had gone part way down the mountain and, stretching out her bony arms and hands, had caused water to run over the rocks and form a brook.

If he had he would not have guessed the reason, but his witch mother was making sure her son could not leave her. She knew that all charms are broken when the one upon whom the spell is cast steps into running water.

Yaco she had formed from an ugly black rock that stood by her doorway, and now she would let him take his form again.

Slowly down the mountainside Witch Teg watched her son driving his pigs. For a minute Yaco stopped when he saw the water. Then, seeing it was not deep, he drove the pigs in. Before his astonished eyes they resumed their former shape—a heap of stones

Yaco stepped in to touch the stones and instantly he became one of them, only big, black and ugly—just the shape he had been when Witch Teg changed him into the son of a witch.

The village folks at the foot of the mountain point out the black rock and call it the Witch's Son because it is shaped like the head of a man, but they do not know that once it was Yaco, the son of Witch Teg, who was ashamed of his witch mother.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day, lucky jewel

ELLA

ELLA is an elfin name. Its scource lies in Fairyland, where the elves, or white spirits, were supposed to be gifted shadowy beings given to influencing strangely the lives of mortals. Ella means "elf's friend."

The elf king was called Elherich. His fairy kindred and their popularity in England and Ireland, established the use of elf names early in history. Everyone remembers Aelfgifu, the unfortunate Elgiva, whose beauty was like the fairy gift which her name signifies, and brought ruin upon herself and her husband.

Aelfwine (elf darling), daughter of the earl of Southampton, was Knut's first wife. A bishop of Lichfield was called Aelfwine, but he preferred to be addressed as Aella. This is the first appearance of Ella, and it seems curious that it should have been of a masculine name.

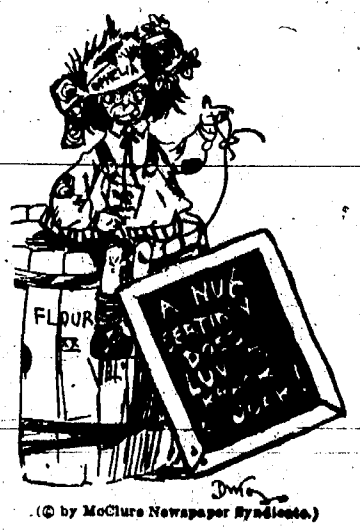

Aella, as it was then spelled, named the sponsor for the execution of Ragnar Lodbrog, and it was Aelle of Deira whose name caused Gregory the Great to say that "Alleluja" should be sung in those regions.

Ella is much used in this country, but her significance is so little known, that her popularity must be attributed to harmony of sound.

The opal is Ella's talismanic gem, but the fairy, which popular superstition declares is imprisoned within the stone, must be a good fairy, for Ella is promised many friends, success and much happiness. Friday is her lucky day and 2 her lucky number.

Reflections of a Bachelor Girl

By HELEN ROWLAND

THE same woman may be a goddess to a boy, a temptation to a married man and a menace to a bachelor.

No man is ripe for matrimony until his heart has been broken at least once; and the first girl who threw him over is an angel in disguise.

Every man believes that woman's "sphere" is marriage; but that a girl should never, never think about it, except in the beautiful abstract, until some man mentions it to her.

True love says, "Love me—or I suffer!" Infatuation says, "Love me—or I'll make YOU suffer!"

Forty-five is the magic age at which a man has just begun to LIVE—when he still retains all his teeth, some of his hair, the outlines of his youthful figure, and most of his really worthwhile illusions, but has shed most of his egoism, his cynicism, his foolish dreams, and all his impossible expectations of life.

Youth's idea of "success" consists in covering the course (of life) with the fewest possible strokes (of effort).

In China, a wife can be divorced in half a minute—for talking too much. Oh, Reno, where is thy sting!

Somehow, a girl in breeches only seems to look more girly!

A LINE O' CHEER

By John Kendrick Bangs.

CITY FLOWERS

THERE may be flowers in the fields,
But sometimes on the city street
Amid the surge of weedy yields
A rare bloom I chance to meet—

Some flower of childhood on the way
Of pain, with eyes like violets,
Whose laughter eases the dark day
Of all its trials and regrets;

Some flower of womanhood that goes
Down to the arid depths of care,
And like some lovely human rose
With beauty veils the sorrow there.

Politics and the Railroads

To the present generation of Michigan Railroad men it is a grateful thought that this Peninsular commonwealth is appreciative of the fact that Railroad Service is today the best in Michigan history.

We know this appreciation by actual expressions—spoken and written—and by the gradual disappearance of that ancient hostility which featured an era of Railroading long past.

Most people realize that Railroad Service has been re-established despite laws which restrict management in every detail—laws which add huge burdens of expense to Railroad operation without assisting in any way toward Railroad progress or the development of Railroad Service.

Those who understand these facts give full credit for the achievement of Michigan's twenty-four steam Railroads and are prompt to resent selfish attacks on them. Before this defense—a defense based on facts—railroad aspersion is becoming out of date, except for spasmodic revivals at election time, when office seekers, desperately fighting for votes, sometimes endeavor to turn Railroad abuse into political capital.

Railroads have small chance to meet such attacks. Railroad men are too busy furnishing transportation and conducting negotiations with the various Government boards and commissions which so closely supervise our every act. In this extremity we must rely on you to protect and defend us, and to insure us a square deal.

Is this reliance well placed?

Michigan Railroad Association

508 Railroad Exchange Bldg., Detroit, Mich. (9-27)

"We Serve Michigan"

Ammunition

The revolver using loose ammunition or paper cartridges was invented about 1835. Since 1860 we have had metallic cartridge ammunition. Since this invention no essentially new discovery in methods of ignition has been made, but smokeless gunpowder and concentrated explosives have added to the effectiveness of firearms.

Permanently Wise Man

Wisdom is like electricity. There is no permanently wise man, but men capable of wisdom, who, being put into certain company, or other favorable condition, become wise for a short time, as glasses rubbed acquire electric power for a while.—Emerson.

Capacity of Elephant

An elephant works from the age of twelve to the age of eighty. It can haul 15 tons, lift half a ton and carry three tons on its back.

Displaying the Flag

When the flag is hung vertically to be viewed from one side only it should be hung so the blue field and stars are to the right as the spectator faces the flag. As a banner across a street the flag should be hung with the field of blue toward the north in streets running east and west, and to the east in streets running north and south.

Pays to Be Careful

A small boy said that a gun was dangerous without lock, stock or barrel, because his daddy licked him with the ramrod. Careless men find ways to hurt themselves anywhere, while careful men can do hazardous work all their lives and never get a scratch. —The Night Watchman.

Some People Lack It

Jud Tunkins says what you learn by experience is generally what common sense should have told you in the first place.—Washington Star.

STOP RHEUMATISM WITH RED PEPPER

When you are suffering with rheumatism so you can hardly get around just try Red Pepper Rub and you will have the quickest relief known.

Nothing has such concentrated, penetrating heat as red peppers. Instant relief. Just as soon as you apply Red Pepper Rub you feel the tingling heat. In three minutes it warms the sore spot through and through. Frees the blood circulation, breaks up the congestion—and the old rheumatism torture is gone.

Rowles Red Pepper Rub, made from red peppers, costs little at any drug store. Get a jar at once. Use it for lumbago, neuritis, backache, stiff neck, sore muscles, colds in chest. Almost instant relief awaits you. Be sure to get the genuine, with the name Rowles on each package.

MEN YOU MAY MARRY

By E. R. PEYSER

Has a man like this proposed to you?

Symptoms: Very bossy—acts as if you were a machine; in fact, treats everyone that way. Rather stout, dresses quietly, doesn't stick at anything long, only has a job for a few months at a time, thinks he knows more than his superiors, gossips and gets in wrong all over the place. Talks in platitudes and thinks he is clever because he always has a pat remark. Thinks you can anchor him at one job.

IN FACT

No dreadnaught anchor could keep him "put."

Prescription for bride-to-be:

℞ Gallons of stand-pat cocktails served at one time.

Show him the boss isn't a boss because he knows nothing.

ABSORB THIS:

The right platitude is no substitute for the right attitude.

Have You This Habit?

By Margaret Morison

MR. SMILEY

THE lawn party became an impressive occasion when Mrs. Alexander King appeared on the arm of her son, John. Impressive, that is, to all but Mr. Smiley. Presently Mrs. King heard a stage whisper behind her: "Do you enjoy a joke?" She turned to find Mr. Smiley knocking out the rung of a camp stool so that anyone sitting down upon it would be precipitated to the ground.

"It's for John," he explained.

Now Mrs. King did not wish to put John in the position of being protected by his mother; so she said nothing though she kept her eye on the "joke." Then someone came to speak to her, and she turned away. The next minute she heard a frightened cry. A distinguished French woman was visiting town at the time. And it was she, not John King, who had fallen victim to Mr. Smiley's American humor.

An evil fate seemed to pursue Mrs. King after that lawn party. About half way through the winter a business friend of her husband died, and out of respect to him she went to the funeral. She was ushered to a pew well forward. As she sat waiting for the service to begin, she noticed that someone else had slipped in beside her. She looked up, and to her horror, there was Smiley; and a glance at his countenance made her realize that his habit of banter was upon him. When she knelt for the prayer, she found that two cushions had been slipped before her; she was offered a hymnal upside down; and during the reading Smiley tried to show her caricatures of the mourners that he was drawing on the back of an old envelope.

"We might as well see the funny side," he whispered complacently. The very next day, as it happened, John King brought home to dinner an old college friend who had become a theatrical manager.

"Do you know a Mr. Smiley?" asked the theater man.

Mrs. King shuddered.

"Smiley wants a comedy part in our new play. I was interested to know he has your backing, Mrs. King," John's friend went on deferentially.

"Mr. Smiley's part in my mind is pure tragedy," broke in Mrs. King with emphasis.

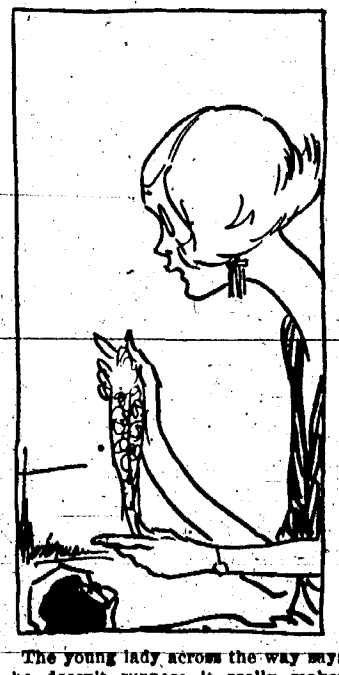

"Oh, in that case, Smiley wouldn't do," ended the other.

And Smiley never knew why his histrionic ambitions had been so suddenly snuffed out, as he pursued unsquelched his habit of trying to be funny.

SCHOOL DAYS

THE WAY YOU ARE

By DOUGLAS MALLOCH

IT'S the way you live, not the way you talk,
Not the way you preach, but the way you walk,
That the world will judge, whatever you claim,
That the world will praise, or the world will blame.

It's the way you do, not the way you say,
Not the way you spend, but the way you pay,
It will like the least, or will like the most,
It's the way you work, not the way you boast.

It's the way you sing, not the way you sigh,
Not the way you whine, but the way you try,
That will hold you down, or will help you far—
Not the way you seem, but the way you are!

(© by McClure Newspaper Syndicate.)

Something to Think About

By F. A. WALKER

THE WEAKEST LINK

THE old story of the chain and its weakest link, quite as familiar to bright school children as are the names of William and Mary, gets but scant recognition from present-day folk, so occupied with frivolities that they have no inclination to look for the core in proverbs.

"A chain is a chain," they will tell you, so why philosophize anent its weakest link or the carelessness of a blacksmith!

A good many of us are indisposed to search into the reason and nature of things because it involves a little real thinking.

We are strong and grand and noble. We have great affairs to handle, so why bother with antiquated saws which are apt to scrape our fine sensibilities or cut off a rotten bough or two of our self-esteem, which would never do, because we should be forever disgraced before our friends.

We hear a great deal about the "missing link," but little is said regarding the "weakest link," which really concerns the truly noble men and women who are seeking to brighten the world and make it better, by giving encouragement to the weaklings of humanity and helping them to become strong and self-dependent.

It is good to meet these humane people and hear them talk, praising others but never complimenting themselves. They realize the frailties that hold them back in their efforts to do good, but keep pressing forward, deaf to tattling tongues and doing the best they can.

They know that somewhere in their physical and moral make-up there is a weak link likely at any moment to snap. But this knowledge does not deter them from doing their full duty.

We, who doubt their sincerity, would be a sorry lot indeed if these good souls were not among us.

Without them our chain might break and our ship be lost, for we incline to obstinacy, snobbery disbelief, irreverence, extravagance, looseness of speech, selfishness, hate, disrespect for the aged and disregard of the commandments.

Theirs is a life of love and devotion, filled with well doing and an abundance of faith.

And ours, shame upon us, is just the opposite, held here by a chain of many weak links, liable to break at any hour and set us adrift upon a storming sea, unlighted by a single ray of hope!

(© by McClure Newspaper Syndicate.)

Mother's Cook Book

Howe'er it be, it seems to me
'Tis only noble to be good.
Kind hearts are more than coronets
And simple faith than Norman blood.
—Tennyson.

VARIETY FOR YOUR TABLE

THE kind of food we serve to our families depends largely upon the family. If there are children in the family, they need plain, wholesome, easily-digested food. They also should have plenty of fruit and vegetables. During the warm weather a day without meat is advisable and all meats should be cut down in quantity. The overfat are much better if they will go without a meal occasionally, letting the digestive tract have a rest.

Butter, cream and rich foods should be avoided by those who are inclined to put on weight. Starchy foods, like potatoes, should be eaten sparingly.

Nitrogenous foods are easily decomposed, especially during the warm weather. The by-products from this decomposition are more or less poisonous and care should be used in serving all such foods.

Baked Chicken in Milk.

One may use skim milk for this dish if there is any reason to cut down on the fat for the family. Prepare the chicken as for fricassee. Place in a baking dish after it has been rolled in seasoned flour and fried a delicate brown in butter. Cover with sweet milk and bake for several hours in a moderate oven. The milk will cook down and with the flour make a delicious gravy to serve with the chicken.

Graham Gems.

Take one cupful each of graham flour and sour milk, one-half teaspoonful of soda, one-half teaspoonful of salt, one well-beaten egg, two tablespoonfuls of sugar and three tablespoonfuls of melted shortening. Mix and drop into well-buttered gem pans and bake in a moderate oven. This amount makes six good-sized gems.

Fruit Cream.

Break one egg white into a bowl, add one-half glass of jelly and two tablespoonfuls of sugar; beat until stiff enough to stand. Serve in sherbet cups topped with sweetened and flavored whipped cream.

Has Anyone Laughed At You Because—

By ETHEL R. PEYSER

You stop to play with a child on the street?

Maybe the folk that laugh at you wish that they, too, could be natural enough to give in to the feeling of loving children enough to stop and pat or speak to them. Think of the fun it is to get a little smile or a "hello" out of the little things? You are enriched every time you get a smile out of anyone, much less a baby, who is so trustful. Keep it up; don't let any sneering pal let you lose so simple, so sweet, even holy a joy.

Too many people think so much of what the other fellow thinks that they strangle every decent instinct they have. Be glad that you have good instincts and hold on to them in this hustling, bustling, thwarting (unless we hold on tight) world. Don't worry if they call you old batch or old maid when you meet a child.

SO

Your get-away here is:

The greatest souls in the world have celebrated the child in story, picture, verse and song. Why shouldn't you have your share of celebrating, too?

(© by McClure Newspaper Syndicate.)

Better-Sires Honor Roll Growing Fast

Thirty-Four Counties Use Pure Bred Exclusively.

(Prepared by the United States Department of Agriculture.)

Thirty-four counties in the United States have the distinction of containing 100 or more farms where pure bred sires are used exclusively for all kinds of live stock raised and whose owners are using breeding methods leading to still further improvement.

The list of counties, which is contained in a recent report issued by the bureau of animal industry, United States Department of Agriculture, shows that the counties are located in the following states: Virginia, Ohio, Kentucky, West Virginia, Washington, Vermont, South Carolina and Nebraska. The activity of the various counties in live stock improvement work has been encouraged largely by county agents. Of the 34 counties having more than 100 farmers enrolled in the "Better Sires—Better Stock" campaign, eight of them each have more than 200 pure bred sire users. Those counties and the county agent are as follows:

County and County Agent	Persons Enrolled
Pulaska, Va.—E. C. Grigsby	589
Rockingham, Va.—Charles W. Wampler	384
Greene, Ohio—Ford S. Prince	359
Union, Ky.—S. C. Brewer	347
Oldham, Ky.—Gordon B. Nance	248
Hardin, Ohio—F. S. Hagy	236
Upshur, W. Va.—H. G. Sturn	235
Miami, Ohio—C. M. Senn	220

Plant Strawberry Patch in Almost Any Location

The strawberry will grow in almost all locations in the state. An area of 2,000 or 3,000 square feet will produce a season's supply of berries for the average family. For these reasons the strawberry bed is recommended by Prof. R. J. Barnett, horticulturist of the Kansas State Agricultural college. A few important suggestions for successful strawberry culture made by Professor Barnett follow:

On the site chosen the soil should be almost as fertile as for a vegetable garden. Rows may be as close as 36 inches and the plants 15 inches apart in the row. Plants must be "maiden sets"—that is, runner-set plants of last summer, which have never borne fruit. A strawberry plant should have all old leaves and all but two or three of its new leaves pruned off when set. The roots should be cut back to about two and one-half inches in length. Set a strawberry plant just so none of the roots are above the surface of the ground and no soil covers the eye or growing bud of the plant. The soil should be pressed so tightly over the well-spread-out roots that the plants cannot be pulled up by one leaf stem.

Excelsior, Dunlap and Aroma are good home patch varieties which ripen in the order named. Superb or Progressive may be planted if an everbearing type of strawberry is desired.

Experiments With Swine Feeding on Alfalfa Hay

In a test of methods of fattening pigs conducted by the New Mexico station, using two lots of 16 pigs each on alfalfa hay, one lot was fed a full ration of ground milo maize and a small quantity of skim milk, while the other received a limited amount of these supplements. The first lot was ready for market 30 days earlier than the other. In another test with pigs on alfalfa hay, one lot was fed a mixture of milo maize and mesquite beans (2:1), and the other lot had a full ration of ground milo maize. The results indicate that with pork at 10 cents a pound, milo maize $1.50 per 100 pounds, and alfalfa hay 50 cents per hundred pounds, mesquite beans are worth $1.30 per 100 pounds. Some difficulty was experienced in getting the beans properly ground for the pigs. This was best accomplished by grinding the beans and the grain together in the proportions wanted.

Farm Hints

Raise alfalfa and keep the feed bill down.

* * *

Water is used too sparingly on many farms.

* * *

Feed grain to dairy cows until the pasture is in full growth.

* * *

Good crops and fair prices are the foundation of every sort of business prosperity.

* * *

New York stands second in the number of dairy cows, with Wisconsin first and Minnesota third.

* * *

It's too much to expect good calves from poor mothers, but a pure bred sire will help.

* * *

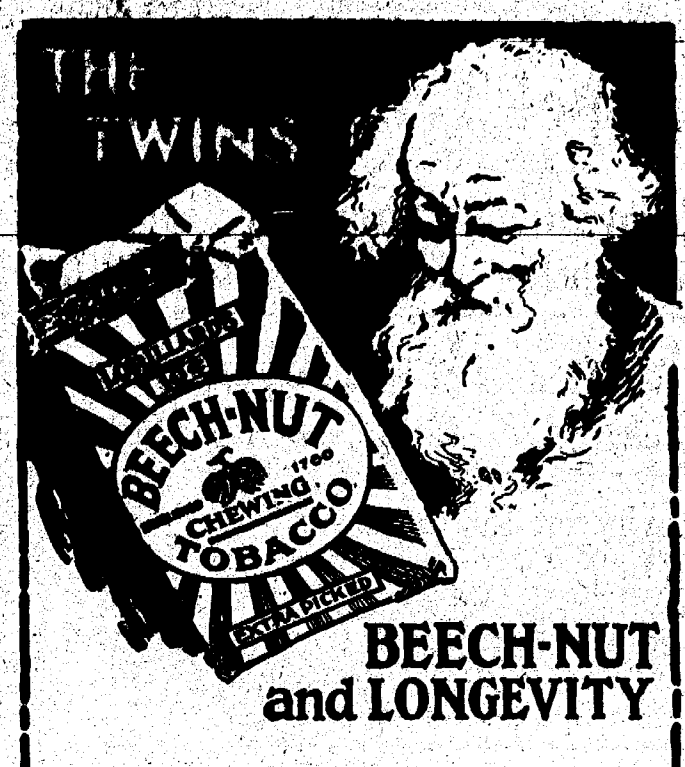

Apple scab costs growers of the United States approximately $40,000,000 a year. Proper spraying would greatly reduce this loss.

* * *

"Legumes" are plants of the pea or bean family; they include clovers, alfalfa and even trees, such as the locusts. Legumes help improve the soil, and furnish nutritious foods and feeds.

* * *

In experiments conducted by the New Jersey Agricultural Experiment Station to reduce scab and rhizoctonia, potato seed treated with corrosive sublimate yielded 83.9 bushels more per acre than did untreated seed.

BEECH-NUT and LONGEVITY

STICK to BEECH-NUT Chewing Tobacco and live to a ripe old age.

Insurance statistics show that chewers have better teeth, stronger digestions and sounder nervous systems than any other type of tobacco users.

Chief Justice White and Mr. Justice Harlan chewed even in the Supreme Court room, and died in harness and full vigor at 76 and 78 years respectively.

Wherever men are hard at work with head or hand—on or at the bench—on legislative and factory floors—or in the great big outdoors—BEECH-NUT Chewing Tobacco is steadying judgment, sustaining energy and arresting fatigue.

Over 250 million packages sold in a single year. Judged best everywhere. Far more than 10c. deserves.

P. Lorillard Company

PENINSULAR

(Edited by Mrs. E. Hayden)

Ira Weaver and his chum Kenneth Olson of Boyne City are spending part of their vacation at the home of Ira's grand parents, Mr. and Mrs. Ira McKee in Star Dist. helping with the farm work.

Mr. Nelson R. Torry of Cadillac was on the Peninsula Tuesday in the interest of the monument work of that place of which he is the owner and operator.

Misses Grace Phillips and Audy Holly of Boyne City spent Thursday and Friday at the L. E. Phillips farm in Advance Dis.

Mrs. Elsie Holly Jacobson, an old resident of Star Dis. but now of Boyne City was the first and only one so far of the gentler sex to climb the Fire Tower at Whiting Park.

The Fire Tower is a great attraction, hundreds of people have already visited it and only a few have climbed to the lookout.

The workmen finised the Fire Tower Thussday noon but it is not yet equipped with anything for observation.

W. C. Howe of Overlook farm was called to Toledo, Friday, by the serious illness of his mother.

The Russells of Ridgeway farms planted 80 gallons of Bass in Pine Lake for the Rod and Gun Club, Friday.

Mrs. Lawrence Bennett and children who have been visiting Mr. and Mrs. Joel Bennett and other relatives on the Peninsula since Decoration Day, returnned to her home in Flint, Saturday.

Mr. and Mrs. F. H. Wangeman and daughter Miss Mildred and Mrs. Wangeman's parents, Mr. and Mrs. A. J. Beers of Three Bell Dis. motored to Northport and visited relatives Sunday. They returned the same evening.

Mrs. Ray Loomis is giving a miscellaneous shower at her home at Gravel Hill N. S. Thursday afternoon for Miss Florence McKee who is soon to depart from the state of single blessedness.

We got our first returns from our milk from the cheese factory the 20th, and they proved to be almost to a cent the same as for butter at 40 cents per lb. and so much less work; and as far as I can see there is no difference between the whey and skim milk and I feed the pigs and pay strict attention for feeding pigs; some have dropped out and some new ones are sending, us lazy ones hope enough will send so the carrier, Lyle Wangeman will continue to carry.

The cut worms are very distructive in this section and the work of replanting the pickles is the order of the day.

If you are one who thinks life is a joke, the joke is on you.

Call Phone 24 for Expert Storage Battery and Electrical Service.—The Battery Shop, L. Miles. adv. 27tf.

To the ladies of Soronian Hive No. 452, L. O. T. M.:—Assessment No. 6 and tax must be paid on or before June 30th to Emma Brennon, West Side. adv.

Mr. and Mrs. Archie D. Clink with daughter, Alice E., are here from Eugene, Oregon, for a visit at the home of the former's parents, Att'y and Mrs. E. N. Clink.

Genuine Reichsbank 100,000 mark notes (pre-war value, $25,000) will be presented each purchaser of an admission ticket to the Temple Theatre this Saturday evening, June 28th. adv.

Among those here to attend the funeral of Mrs. Clyde Hipp last Tuesday were John P. Lenhard of Frankfort, Clem of Saginaw, George of Detroit, Frank of Gagetown, Mrs. Catherine Rocheleau of Gagetown, Mrs. Elizabeth Secoir of Battle Creek, and Mr. and Mrs. John Weiler of Gagetown—all brothers and sisters of the deceased.

Darwin F. Meech of Charlevoix was in our city, Wednesday. Mr. Meech is a candidate for the office of Register of Deeds on the Republican ticket at the September primaries. "Dar" is thoroughly conversant with the duties of this office and would make a mighty good official.

George B. Thompson passed away at his home in Jordan township, Antrim County, Thursday, June 19th, from heart trouble. Deceased was born in Iowa, May 3rd, 1849. Leonard Thompson of Jordan township is a son. Funeral services were held from his late home Saturday afternoon.

Members of Resort Base ball League, which includes Cadillac, Traverse City, Kalkaska and other towns, are in a bad way financially, weather having been against them. Kalkaska with three games on the road is particularly hard hit and the players have been paying their own expenses. The Mint League, of which Grand Rapids is a member, is also working its way toward the financial rocks. Cold, rainy weather, has kept attendance so low that the gate did not pay the expense bill. A subscription was taken in Saginaw recently to meet the salary bill of that team's players.

The only men who profess to understand women are those who can't even understand themselves.

Ypsilanti—Five members of the Michigan Central Railroad section crew here narrowly escaped death when their hand car was struck and demolished by a special train near the city limits The noise of a passing freight train prevented the men from hearing the approaching passenger train until the moment it struck the car. The men leaped to safety. The train was delayed here an hour owing to damage to the engine.

Detroit—Rev. Thomas J. Gregg, 45 years old, pastor of the Methodist church at Clarenceville, died in a Detroit hospital, where he was taker with a fractured skull after his auto mobile had been struck by an interurban car at Grand River and Carpenter switch. Witnesses said Mr. Gregg attempted to drive from one side of Grand River avenue to the other in front of the car and was dragged 150 feet before the interurban could stop.

Ypsilanti—The new valuation of Ypsilanti for the purpose of taxation is $9,014,095, according to Supervisors George Gaudy and Elmer Mowrer. This is an increase of nearly a million dollars over last year. The average tax rate for the entire city will be about $22.77, an increase of $6.02 over last year's rate. The budget for the coming year calls for the expenditure of $203,950, while last years budget was $144,700. The increase is due largely to an increase in salaries of all city employes.

Detroit—William Cult and William B. Stoneburger, mine shaft construction superintendents of the Drave Construction Co., were overcome by gas and drowned 642 feet beneath the ground in a new shaft at the salt mine of the Detroit Rock Salt Co., in Oakwood, near the intersection of Fort street west and the Wabash Railroad. Cult, who was superintendent in charge of construction at the new shaft, met death in a futile attempt to rescue Stoneburger, the assistant superintendent. Three other men have met death similarly.

Alpena—Work has been resumed on the breakwater at the entrance to the harbor here by the Derocher Co., which was compelled to cease work last fall because of inclement weather. The tug General and lighter Michigan Central have arrived with full crews.

Detroit—A total of $1,065 was taken from the cash registers of five Brownie Drug Stores in the northwestern section of the city within 45 minutes, recently, by four armed men. The descriptions of the bandits and their machine tallied in every instance, the police said.

Kalamazoo—Despite the lateness of the season, the first Kalamazoo celery was placed on the market last week. Chris Wenke was the grower of the initial offering. Celery usually does not reach the market until about the last week in June. It will be another week before extensive harvesting of the early crop is started.

Port Huron—A new telegraph phone cable, carrying 400 pairs of smaller cables, was laid across Black river recently, to replace the one torn loose by the steamer W. J. Crosby. Phone service on the north side, which was interrupted by the breaking of the cable, was restored immediately after the new cable was laid.

Iron Mountain—John Powers, 65, surface foreman for the Oliver Iron Mining company, here, is dead from injuries suffered in an automobile accident. Power's automobile was demolished by a Northwestern railroad passenger train, entering the city. The accident occurred at a crossing leading to the Chapin mine. The victim had been surface foreman for 40 years.

Detroit—George Adams, 40, a tradesman, is dead following a cave-in of a brick wall enclosure at the Michigan Malleable Iron Co., which he was repairing at the time of the accident. Adams was buried alive under a pile of bricks from the wall and was dug out of the ruins by workmen at the plant who saw the wall fall. He was dead upon arrival of physicians.

Iron Mountain—Three thousand pine trees have been planted in parks and along the country road in Iron county by the parks commission. Fifteen hundred were planted in the fair ground park at Iron River. This is the result of the offer of the state to sell pine trees and seedlings at a low cost to those interested in reforestration. A large number were planted successfully last season.

Men always balk at the girl full of talk.

The Safe Way

Valuable papers, jewelry and keepsakes, if kept lying around the house in various places, are liable to bd lost misplaced or stolen. A box in our Safe Deposit Vault supplies you with a safe, convenient fireproof depository for these valuables, and the cost of this protection is very small.

The Bank With the Chime Clock

Peoples State Savings Bank

The man who always agrees with you generally wants something out of you.

For some reason the man who cuts a big figure in society hardly ever cuts a big figure on the salary sheet.

Of all sad words we hear as we pass, the saddest are these, "I ran out of gas."

One of the follies of youth, from the standpoint of the old-timer, is just being young.

Almost anybody can own some kind of car, but that's not the kind of car the family wants.

What My Neighbor Says

Is of Interest to East Jordan Folks.

When one has had the misfortune to suffer from backache, headaches, dizziness, urinary disorders and other kidney ills—and has found relief from all this sickness and suffering, that person's advice is of untold value to friends and neighbors. The following case is only one of many thousands, but it is that of an East Jordan resident. Who could ask for a better example?

Albert Turk, East Jordan, says: "Morning my back felt lame and I found it hard to get up. My back got so weak and sore, I couldn't stoop over. I couldn't get rested and always felt tired and worn out. Dizzy spells came over me, too. My kidneys were irregular and I had to get up during the night. I used Doan's Pills and they cured me of the trouble."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Turk had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

Bump Proof

If you can combine hard work and happiness in your work, you can ride over so-called "hard times" and never feel a bump.

Going, Going, Gone.

Judge—"Thirty days. No, sixty days. Oh, I might as well make it ninety days." Prisoner—"Say, air yiz a jedge or an auctioneer?"

PROBATE ORDER

STATE OF MICHIGAN, The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix, in said County, on the 24th day of June A. D. 1924.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Franklin L. Smith, Deceased.

Olin D. Smith, having filed in said court his petition praying that said court adjudicate and determine who were at the time of his death the legal heirs of said deceased and entitled to inherit the real estate of which said deceased died seized,

It is ordered, that the 17th day of July A. D. 1924, at ten o'clock in the forenoon, at said Probate Office, be and is hereby appointed for hearing said petition;

It is Further Ordered, That Public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix County Herald, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
Judge of Probate.

GIDLEY & MAC, Druggists

Drink Water If Kidneys Bother

Take a Tablespoonful of Salts if Back Pains or Bladder is Irritated

Flush your kidneys by drinking a quart of water each day, also take salts occasionally, says a noted authority, who tells us that too much rich food forms acids which almost paralyze the kidneys in their efforts to expel it from the blood. They become sluggish and weaken; then you may suffer with a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To help neutralize these irritating acids; to help cleanse the kidneys and flush off the body's urinous waste, get four ounces of Jad Salts from any pharmacy here. Take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate sluggish kidneys; also to neutralize the acids in the system so they no longer irritate, thus often relieving bladder weakness.

Jad Salts is inexpensive; can not injure and makes a delightful effervescent lithia-water drink. By all means have your physician examine your kidneys at least twice a year.

White Pine Blister Is Quite Injurious

Currant and Gooseberry Bushes Hosts of Disease.

(Prepared by the United States Department of Agriculture.)

White pine was once our most important timber crop, holding top place in lumber production from 1620 to 1895. It is now down to fifth place, and unless owners of this timber take precautions the ravages of the white pine blister rust will drag it down to a position of still less importance. This disease is now attacking white pines in all the important regions where it grows in this country—in New England, the Lake states and in the Pacific Northwest. There are eight native white pines in the United States, including the eastern white pine, western white pine, sugar pine, limber pine, whitebark pine, Mexican white pine, fox-tail pine, and the bristlecone pine. The Himalayan white pine and the stone or cembrian pine have been introduced from Europe and are to be found to some extent in parks and cemeteries. All of these pines, the native and introduced varieties, are susceptible to the blister rust.

Since currant and gooseberry bushes are the intermediate hosts of this disease of the white pine, the way to protect the pines is to destroy all of the bushes in the pine timber or near it. This is the only practical method. The spores of the rust cannot be transferred directly from one pine tree to another and produce the disease. They must first find a live gooseberry or currant leaf to grow on, and the spores formed there will infect the pines. The United States Department of Agriculture is carrying on campaigns for the uprooting of the currant and gooseberry bushes in white pine regions. Last year the cost of this work averaged 18 cents an acre, but the department says that it would pay even if the cost should mount up to $2 an acre.

Spraying for Fruit Rot Indicates Good Results

Spraying strawberries for the control of leaf-spot diseases has frequently been recommended, and a few growers in widely separated localities have sprayed regularly for fruit rot and have reported an apparent reduction in losses. The first systematic experiments, however, for the control of fruit rots by spraying were made by the United States Department of Agriculture last year, and although the results of this one season's work must be regarded as inconclusive, some favorable results seem to be indicated.

Various sprays were used, and no one seemed to show a marked superiority over another, indicating that no really satisfactory spray schedule has yet been worked out. The investigators feel, however, that the results justify the conclusion that spraying with bordeaux mixture, and in some cases dusting, reduced the losses from rot which developed after the fruit was picked sufficiently to more than justify the expense of the treatment.

Strawberries are grown in this country under a great variety of conditions, and spray schedules must necessarily be varied accordingly. The result of the first season's work seems, however, to indicate that in the region of Beebe, Ark., where this work was done, strawberry rots may be reduced by spraying. It is accordingly planned to extend these spraying tests.

Farm Hints

Plant some sudan grass for hay.

* * *

Kill the weeds while they are small.

* * *

If you have started a garden, you owe it a duty. Do your duty.

* * *

Plant a resistant crop on rootknot infested fields.

* * *

Better yields and bigger profits will unlock the door of opportunity for bigger and better country life.

* * *

Good packing should have backing from farmers as they learn the value of standardized profits.

* * *

The neglected wood land, sometimes despised as a nuisance, has great possibilities as a source of comfortable income.

* * *

If you would build up your farm and your bank account, build a dairy barn and try the cream route to prosperity.

* * *

If seed or plants are purchased, investigate carefully to see that they do not carry diseases.

* * *

As a general rule a cover crop is sown in the orchard as soon as cultivation ceases in mid-summer. When a crop is already on the soil, however, the sowing of the cover crop must wait until this field crop is removed. In some cases there are plenty of weeds on the land and this does very well as a cover without sowing anything else.

* * *

Head back the canes of red raspberries so they will stand about three feet. Tall-growing varieties like Cuthbert should be allowed to remain higher. On blackcaps cut back injured laterals to ten or twelve inches. Good, strong canes properly pruned will have from two and a half to four feet of bearing wood.

SCHOOL DAYS

Reflections of a Bachelor Girl

By HELEN ROWLAND

LOVE is not "life's sweetest gift"; it is merely a loan—at an extortionate rate of interest.

Nobody will ever know what Solomon suffered on Blue Mondays, when all seven hundred of his wives probably got a "martyr-complex" at the same time!

The girl who scatters her kisses around promiscuously may get a few more invitations to go motoring, but she is "scabbing" on her own sex, lowering the market price of love, and making the world safe for bachelors.

A man spends the first twenty years of his life waiting for a chance to shave, the next ten waiting for the barber to shave him, and the rest of it waiting for his wife to tell him to shave.

The man who marries once is an idealist; the man who marries twice is an optimist—or a fatalist; but the man who marries three times is a "glutton for punishment."

The saddest thing in life for a woman is to be born with a "perfect 36 soul," emotionally, and to have to carry it through life under a 166 pound figure.

You can read, in any woman's magazine, of 57 different ways to hold a man's love; but, once a woman's heart gets attached to a man, it is supposed to stick forever like a postage stamp.

(Copyright by Helen Rowland)

ROMANCE OF WORDS

"VAMP"

IMMORTALIZED by Rudyard Kipling and Burne-Jones, the "rag and a bone and a hank of hair" has been popularized of late years by the moving picture screen, the stage and the novelists who appeal primarily to sex interests. The vamp—a contraction, of course, of "vampire"—has become so well known that the verb "to vamp" threatens to carve for itself a permanent niche in the etymological hall of fame, there to take up a place alongside of "mob" and "pluck" and "rap" and other words which, originally, were frowned upon as passing provincialisms.

The folklore of all ages is replete with legends of true vampires—supernatural creatures who lived by sucking the blood of the living and who could be destroyed only by driving a green-wood stake through the dead body from which the evil spirit emanated. Bram Stoker's "Dracula" is probably the best example of this type of vampire, and it was a living woman of somewhat similar tastes whom Kipling had in mind when he composed his famous poem. But the vampire is by no means confined to legend. The real vampires are the bats which suck the blood of animals, though they but rarely attack man. This dangerous species is confined to only a few of the smaller varieties of bats, the large and mis-named "vampire bat" of South America being entirely harmless. Of late years the Kipling-esque vampire has been so prevalent in fiction and in motion pictures that the word "vamp" has taken on a significance entirely different from its accepted meaning with respect to music, and it will be interesting to see how long the vogue of the vampire woman lasts.

Mother's Cook Book

That which renders life burdensome to us, generally arises from the abuse of it.—Rousseau.

Food the Family Will Enjoy

FOR the little people there is no cake which quite satisfies as does a good, well-baked cooky. The following is a valued recipe:

Grandmother's Cookies.

Cream one cupful of unsalted butter with one cupful of granulated sugar, using a wooden spoon; add one cupful of sour cream and one cupful of New Orleans molasses and beat until smooth. Add one-half teaspoonful of cinnamon, one-quarter teaspoonful of allspice, a grating of nutmeg and a half teaspoonful of salt. Sift two teaspoonfuls of soda in a cupful of flour; mix, adding more flour, but use as little as possible. Take out a piece of the dough and pat it out on the board one-third inch thick. Cut out with a five-inch cutter and bake in well-greased pans in a moderate oven. Bake very carefully so as not to burn.

Rhode Island Chowder.

Cook a three-inch cube of salt pork with a slice of onion in one-half cupful of cold water for ten minutes; drain, reserve liquor. Wash one quart of clams and reserve the liquor. Parboil four cupfuls of potatoes cut into cubes, five minutes; drain. To the potatoes add the reserved liquors, the hard part of the clams finely chopped and two cupfuls of boiling water. When the potatoes are nearly done add one cupful of stewed and strained tomatoes, one-fourth teaspoonful of soda, soft part of the clams, one cupful each of scalded milk and cream and two tablespoonfuls of butter. Season with salt and pepper to taste and serve with milk crackers split and moistened with cold milk. All reheated and served very hot.

Belgian Hash.

This is a most delicious dish for those who are trained to like sweet meats. Cook two pigs' feet until all the moisture is absorbed and the meat is tender, using the following liquids: Three-fourths of a cupful of vinegar, one-fourth cupful of water, add one-half cupful of chopped prunes, one-half cupful of currants, one-half cupful of sugar, salt and pepper to taste and one-half of a grated nutmeg. Serve with the fruit in the sauce.

MORTGAGE SALE.

By a mortgage dated the 28th day of December A. D. 1917, and recorded in the office of the Register of Deeds for the County of Charlevoix and State of Michigan, on the 31st day of December A. D. 1917, in Liber 40 of Mortgages, on page 309, Albert Beckman and wife, Lillian Beckman, of the Township of South Arm, Charlevoix County, Michigan, did duly mortgage to Albert Wesselink and Harmeina Wesselink, of Reeman, Michigan, the lands, premises and property situated in the Township of South Arm, County of Charlevoix and State of Michigan, described as follows, to-wit:

The southeast quarter (SE¼) of the northeast quarter (NE¼), and lot number two (2), all of Township thirty-two (32) north, Range seven (7) west, containing 90.68 acres, more or less, according to Government Survey thereof,

Default having occurred in the conditions of said mortgage by which the power of sale therein contained has become operative, and no suit or proceedings at law or in equity having been instituted to recover the moneys secured by said mortgage, or any part thereof:

Notice is hereby given that said mortgage will be foreclosed by a sale of said mortgaged premises, or so much thereof as may be necessary, to pay the amount due on said mortgage with interest at the rate of six per cent. (6 per cent) per annum and all other legal costs, including an attorney fee of thirty-five and no-100 Dollars as provided by said mortgage, at public vendue to the highest bidder on the 23rd day of August, A. D. 1924 at ten o'clock in the forenoon of that day, at the front door of the Court House in the City of Charlevoix, County of Charlevoix and State of Michigan, said Court House being the place of holding the circuit court for said county.

The amount claimed to be due on said mortgage at the date of this notice is the sum of Fourteen Hundred Twenty-five and 40-100 Dollars ($1425.40)

Dated April 28, A. D. 1924.

MORTGAGE SALE.

By a mortgage dated the sixth day of August A. D. 1921, and recorded in the office of the Register of Deeds for the County of Charlevoix and State of Michigan, on the 10th day of August A. D. 1921, in Liber 40 of Mortgages, on Page 427, Albert Beckman and Lillian Beckman, his wife, of East Jordan, Michigan, did duly mortgage to Albert Wesselink of Reeman, Michigan, the lands, premises and property situated in the Township of South Arm, County of Charlevoix and State of Michigan, described as follows, to-wit:

The west half (W½) of the northeast quarter (NE¼) of Section twenty (20), of Township thirty-two (32) north, Range seven (7) west, except a part of the southwest quarter (SW¼) of the northeast quarter (NE¼), and part of the northwest quarter (NW¼) of the northeast quarter (NE¼) of said section twenty (20), being a strip of land four (4) rods wide lying two (2) rods on either side of center line, commencing at a point on the north boundary of said section twenty (20), six hundred seven and nine tenths (607.9) feet east of the quarter post on the north side of said section, running thence on a twelve degree curve to right (E. ward) four hundred forty-five (445) feet to a point tangent; thence south thirty-five degrees forty minutes east (magnetic course) on tangent four hundred thirty-four and two tenths (434.2) feet to a point curve, thence on thirty-eight degree two minute curve to left (E. ward) eighty-seven (87) feet to a point on the east eighth line five hundred ninety-five and eight tenths (595.8) feet south of the section line embracing 1.380 acres of land, as nearly as may be, in said section twenty (20).

Default having occurred in the conditions of said mortgage by which the power of sale therein contained has become operative, and no suit or proceedings at law or in equity having been instituted to recover the moneys secured by said mortgage, or any part thereof:

Notice is hereby given that said mortgage will be foreclosed by a sale of said mortgaged premises, or so much thereof as may be necessary, to pay the amount due on said mortgage with interest at the rate of six per cent. (6 per cent) per annum and all other legal costs, including an attorney fee of twenty-five and no-100 Dollars as provided by said mortgage, at public vendue to the highest bidder on the 23rd day of August, A. D. 1924 at ten o'clock in the forenoon of that day, at the front door of the Court House in the City of Charlevoix, County of Charlevoix and State of Michigan, said Court House being the place of holding the circuit court for said county.

The amount claimed to be due on said mortgage at the date of this notice is the sum of Thirty-four Hundred Twenty-four and 50-100 Dollars ($3424.50).

Dated, April 26, A. D. 1924.

An Odd Flag

An unusual color for a flag is found in the new Belgian royal standard, which is purple, with a gold shield in the center surrounded by a crown. The palm for originality probably goes to Trenggann, one of the Federated Malay States, whose national flag is plain black with a white band next the staff and no ornamentation of any sort.

Treating Cabbage Seed Meets Favor

Two Methods Outlined for Preventing Injurious Diseases of Plant.

(Prepared by the United States Department of Agriculture.)

Two methods for the treatment of cabbage seed for the prevention of the very prevalent diseases—blackleg and black rot—are recommended by the United States Department of Agriculture as very essential and low-priced insurance. Mercuric-chlorid seed treatment is by far the simpler method and has practically no ill effects on the seed. Its only limitation—and this is often a serious one—is that blackleg fungus, though greatly reduced, is not entirely killed, although black rot is almost completely controlled. When seed is known to be entirely free from blackleg this method is adequate, but when the seed is known to be infested with blackleg, the hot-water treatment, must be used. It will completely control the blackleg, but will reduce somewhat the percentage of germination.

How to Make Solution.

Mercuric chlorid (corrosive sublimate) may be procured from any drug store in readily soluble tablet form. Following directions on the package, make up a 1 to 1,000 solution, avoiding metal containers. Place the seed on the center of a square piece of coarse cheesecloth of such size that when the edges are drawn together and tied the improvised sack is not more than one-third full. Immerse in the disinfectant, agitating the seed vigorously so as to remove the air and thoroughly wet the seed coats. Soak for 30 minutes. Remove, rinse in clean water, and allow to drain several minutes. Open the sack on a table top, spreading the cloth out flat. Spread the seed over the cloth in a shallow layer to facilitate drying.

Hot-Water Treatment.

For the hot-water treatment prepare the seed in a cheesecloth sack as described in the above method. Provide a large vessel containing water adjusted to exactly 122 degrees F., a reliable thermometer, and a stirring rod. Immerse the seed bag, agitating the seed thoroughly and stirring the water slowly. Keep the water temperature approximately constant by adding steam or boiling water whenever the thermometer registers below 122 degrees F. Remove the seed bag for an instant as the water or steam is added. Soak for 30 minutes. Remove to cold water, drain and spread out to dry as before.

Try the hot-water treatment on a small sample of the seed and run a germination test to determine the percentage of injury before treating the entire lot.

Bridge Grafting Saves Good Paying Fruit Tree

Fruit trees injured by rabbits or mice during the winter can be saved without undue expense by bridge grafting. Bridge grafting is a simple process but requires skill in the handling of the tools. A bridge graft is made by using scions (small, live twigs) to connect the two portions of the bark of a stock or limb which have been separated by an injury such as girdling by animals or other means. In other words, the injured area is "bridged" by scions, the ends of which unite with the uninjured parts above and below the wound in such manner that a connection between the tissues is established.

Bridge grafting may be used on almost any kind of fruit tree that can be readily propagated by grafting. In practice it is used much more frequently with the apple than with any other fruit, but pear trees are often treated. There is no reason why the method should not be successful on plums and cherries.

Bridge grafting is done in the early spring about the time the trees are starting into growth, the same as in cleft grafting for the purpose of top-working. It does not matter if the trees have started slightly, but it is of great importance that the scions be perfectly dormant. The chances of success are materially decreased if the buds on the scions have started appreciably. It is often necessary to secure the scions some time in advance of the time they are to be used in order to have them in a dormant condition when needed, storing them meanwhile where they will not dry out and where it is cool enough to keep them dormant.

Bouquet of Flowers Was Cause of Larger Yield

A fresh bouquet of flowers placed each morning in the tree tops throughout his orchard resulted in a Grant county (Washington) fruit grower increasing his yield 500 per cent, according to an announcement of the demonstration just made public. The first experiment was begun two years ago when bunches of cherry blossoms from the Black Tartarian trees were placed in three orchards of other varieties of cherries. The pollenization as perfected by bees, flies and other insects resulted in record fruition in the identical trees, as well as those close by. Last spring cherry, plum, peach, pear and apple blossoms were placed in tree tops for pollenization with the growing flowers, and the yield of fine fruit was wonderful. The discovery may revolutionize the fruit industry in the Northwest and elsewhere.—Chicago Daily News.

Candle Eggs Before Shipment Is Urged

Plan Will Eliminate Bad Ones or Those Dirty.

(Prepared by the United States Department of Agriculture.)

Eggs shipped in interstate commerce should be carefully candled by shippers, in order to eliminate those that are bad or that may spoil en route, say officials of the bureau of chemistry, United States Department of Agriculture, who are charged with the enforcement of the federal food and drugs act. Shipments containing eggs which have yolks stuck to the shell, moldy eggs, black spots, addled eggs, any any other eggs which are filthy, decomposed or putrid are in violation of the law.

Federal food inspectors have been instructed to give particular attention to shipments of eggs during the warm months of spring and summer to see that the channels of interstate commerce are kept as free as possible from eggs that do not comply with the law. Shipments of eggs that are in violation of the law may be seized and the individuals responsible for the interstate shipment prosecuted under the federal food and drugs act, say the officials. Some of the states have specific laws requiring the candling of all eggs placed on sale.

Careful candling before shipment will enable dealers to eliminate the bad eggs. The elimination of the spoiled eggs before shipment not only removes the hazard of violating federal and state food laws, but it is economical in that it saves shipping charges on eggs likely to be rejected at place of receipt.

The United States Department of Agriculture has a bulletin on the best methods and equipment for candling eggs. This bulletin may be obtained without cost upon application to the department at Washington. Ask for Department Bulletin 565, "How to Candle Eggs."

Materials and Methods for Efficient Spraying

In "Some Sidelights on Dusting and Spraying Practices," Prof. P. J. Parrott, entomologist at the Geneva experiment station, said:

"The past summer was notable for the destructive work of the codling moth. Worm holes in apples were second in importance to apple scab, both being chiefly responsible for the large numbers of inferior apples produced in many orchards. Unusual abundance of side-wormy apples in carefully sprayed orchards proved that methods and materials which have been reasonably efficient in the past did not give as good control as usual."

Speaking of the double benefits, Professor Parrott said it was well to keep in mind the fact that customary treatment given to prevent wormy apples serve two objects, that of keeping the apples free from worms and of reducing the extent of the carry-over of the pest in the orchard which largely determines the degree of infestation during the following year.

Top-Dressing Hay Land Is Profitable Practice

Fertilizer demonstrations conducted by the Middelsex, Mass., county extension service, during the past year bear out the evidence obtained in previous work of a similar nature, namely, that the proper use of fertilizers on hay land produces increased crops at good profit. The returns from both nitrate of soda or an 8-6-6 fertilizer were uniformly good on the six farms in the county on which demonstrations were carried on.

In each test, a fertilized plot was compared with a check plot, the combined average yields for all six being 2.4 tons and 1.3 tons per acre, respectively. Thus the fertilizer treatment, produced an average gain of 1.1 tons of hay per acre.

FARM NOTES

Plan a large acreage of feed crops.

* * *

Destroy all breeding places of flies.

* * *

Mow weeds off of pastures every two weeks.

* * *

Uncovered garbage pails and manure piles are breeding places for flies.

* * *

Spray, or dust, the Irish potatoes with arsenate of lead to control the potato bug.

* * *

Plant every acre possible in soil building crops, such as velvet beans, cow peas, and soybeans.

* * *

Any farmer convicted of soil robbing should be sentenced to the condemnation of his neighbors.

* * *

For the striped beetle in the garden use Bordeaux-arsenate spray or a 2 per cent nicotine dust.

* * *

Mulch the tomato plants heavily with straw or leaves to conserve moisture and prolong the fruiting period.

* * *

Apply nitrate of soda to the garden crops if they are not growing satisfactorily. Spray apple trees to control the codling moth.

* * *

It is the duty of every family to plant a garden which will provide an adequate supply of vegetables for the entire year.

Wide Variance in Cost of Potatoes

Study Carried on by Department of Agriculture in Big Producing States.

(Prepared by the United States Department of Agriculture.)

Yield per acre is the principal cause of variation in the cost of producing potatoes, the United States Department of Agriculture points out in a cost study in important potato producing sections of Minnesota, Wisconsin, Michigan, New York, and Maine. The survey dealt with costs in 1919, but the conclusions drawn are generally applicable to other years.

Farmers who received better than 130 bushels of potatoes per acre produced them at an average of 72 cents while those who had a yield of less than 70 bushels had an average cost per bushel of $1.49. The cost per bushel of potatoes grown on 461 farms ranged from 30 cents to $2.45, with most farms producing at a cost of $1 or less per bushel.

Important Cost Items.

Man and horse labor were the most important items of cost in areas studied in Minnesota, Wisconsin, Michigan, and New York, whereas commercial fertilizer was the largest item of cost in Aroostook county, Maine. In Aroostook county the fertilizer cost was larger per acre than the combined cost of man and horse labor.

The cost per acre was lowest in Clay county, Minnesota, being $78.09, and higher in Aroostook county, Maine, where the acre cost was $219.60. The yield per acre in Clay county, Minnesota, was 103 bushels, making the cost per bushel 76 cents, while a yield of 278 bushels in Aroostook, Maine, resulted in an average cost per bushel of 79 cents.

Potatoes fitted into a fairly definite crop rotation in all areas except in Clay county, Minnesota, where wheat and oats were not grown in any definite rotation with potatoes. In the other areas hay, potatoes, corn, (where corn is grown) and a small grain seeded to grass constituted the rotation. The per cent of farm receipts coming through the sale of potatoes varied from 41.5 per cent in Barron county, Wisconsin, to 94.5 per cent in Aroostook, Maine.

Man and Horse Labor.

In areas where none of the picking labor was contracted for and as a result the hours of picking up potatoes were included, the total hours of man labor expended in raising an acre of potatoes varied from 63.7 hours in Anoka county, Minnesota, to 92.7 hours per acre in Barron county, Wisconsin. The hours of horse work used per acre were the lowest or 65.7 in Clay county, Minnesota, and highest in Monroe county, New York, where 116.0 hours were used. Commercial fertilizer was applied at the rate of 1,080 pounds per acre upon potato land in Aroostook county, Maine. None of the other areas studied approached this quantity of commercial fertilizer application.

The amount of man labor and horse work, together with the cultural practices for each area, are given in detail in Department Bulletin 1188, Cost and Farm Practices in Producing Potatoes, copies of which may be obtained free upon request to the Department of Agriculture, Washington, D. C.

Most Farm Coöperatives in North Central West

More than 45 per cent of the 10,160 farmers' business organizations reporting to the United States Department of Agriculture up to April 1 are in the seven west North Central states including Minnesota, North Dakota, South Dakota, Iowa, Missouri, Nebraska, and Kansas. Over 25 per cent of the associations are in the five east North Central states, including Ohio, Indiana, Illinois, Michigan and Wisconsin, and more than 8 per cent are in the three Pacific Coast states.

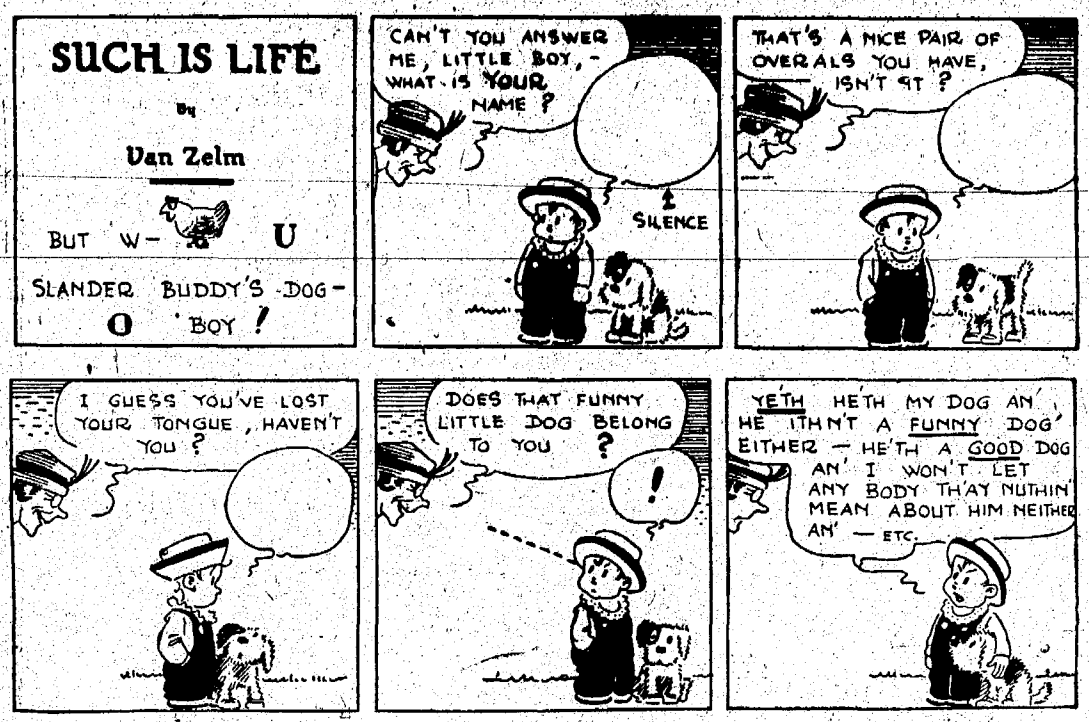

Minnesota leads in number of associations, 1,330 organizations being reported from that state. Other states with numerous farmers' business organizations are Iowa with 1,039; Wisconsin, 879; Illinois, 640, and Nebraska, 477. Seven hundred and seventeen co-operatives are engaged in retailing. These are mostly stores and a large percentage of them are located in the following states: Minnesota, 86; Nebraska, 86; Iowa, 84; Kansas, 68; Wisconsin, 49.

Cattle-Tick Eradication Now Possible Anywhere

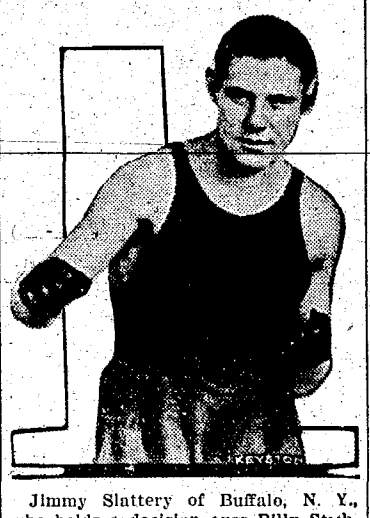

Experience shows that it is possible to eradicate cattle-fever ticks anywhere, even on swampy, brushy, free-range land, asserts the United States Department of Agriculture in an exhibit panel recently prepared for display in tick-infested localities.

To convince the skeptical observer, the department shows a picture of such land, where eradication was accomplished and which has been free from ticks ever since. The average observer might think it futile to attempt tick eradication in a region such as pictured. The grass often swarms with young ticks.

Dipping cattle, however, kills the ticks before they develop to the reproductive stage, and ticks that do not get on cattle die in a few months. Thus the cattle-fever tick becomes extinct in one season in localities that conduct thorough systematic dipping.

Carpentier to Fight Slattery

Jimmy Slattery of Buffalo, N. Y., who holds a decision over Billy Stribling, who is to meet Georges Carpentier at home the first week of August.

Got a Ride Anyway

"A man got hisself some loaded dice," said Uncle Eben, "'spectin' to win hisself a plush-lined flivver, 'stid o' which he got nuffin' but a one-way ride in de ambulance."

Dewberries Ripen Early and Have Sweet Flavor

The dewberry fruits are larger than those of the blackberry and ripen earlier. They have a very desirable flavor all their own. They are not hard to grow, but are sometimes rather fickle in their bearing, but are made more certain by having other berries of the blackberry family blooming about them, or two or more varieties of dewberries may be planted together, as they do not self-fertilize very well. They like a rich clay soil, like blackberries, but will grow well on most soils. The canes are slender and long and are best kept on a flat trellis made by fastening a two-foot strip of poultry wire 18 inches above the ground on stakes. The canes will push up through the meshes and can be left to spread over the surface of the wire and cultivation progress below. This keeps the fruit up off the ground.

Origin of "Simon Pure"

In Mrs. Centlivre's comedy, "A Bold Stroke for a Wife" (1717), Simon Pure is the name of a Quaker who is impersonated by another character during part of the play. We say "the real simon pure," meaning the real, genuine or authentic thing or person. As an adjective it means authentic, genuine, real.

HAVE DARK HAIR AND LOOK YOUNG

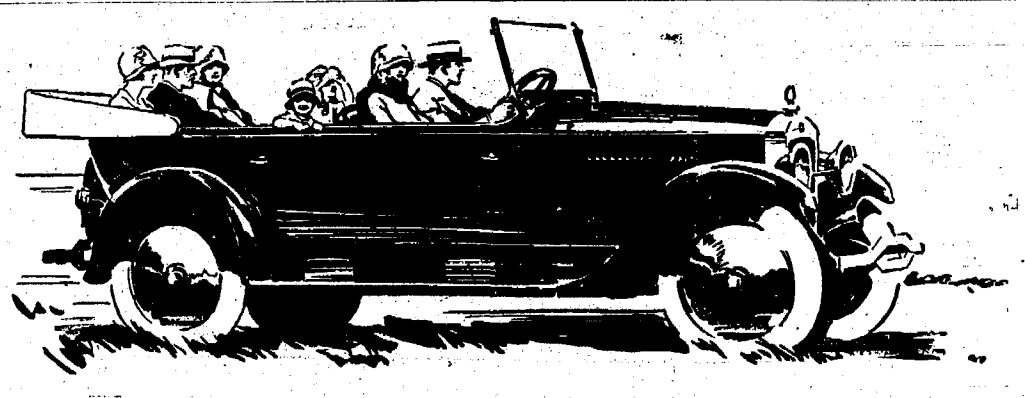

Nobody Can Tell When You Darken Gray, Faded Hair With Sage Tea

Grandmother kept her hair beautifully darkened, glossy and attractive with a brew of Sage Tea and Sulphur. Whenever her hair took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect. By asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this old-time recipe, improved by the addition of other ingredients, all ready to use, at very little cost. This simple mixture can be depended upon to restore natural color and beauty to the hair.

Well-known druggists say everybody uses Wyeth's Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use, too. You simply dampen a comb or soft brush and draw it through your hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and beautiful.

Telephones in New York.

New York city has more telephones in the whole of Great Britain?

When you need more room—*it is there!*

THE Big-Six Touring is a seven-passenger car—not merely a seven-passenger body mounted on a five-passenger chassis.

It was designed and built for seven-passenger service—with a motor of ample power and stamina for seven-passenger satisfaction.

Then, too, with the auxiliary seats folded away, the Big-Six becomes the most desirable five-passenger car in which you have ridden, with room enough for all the luggage you will ever need.

Big-Six appearance is attractive, distinctive, and in good taste. Its performance, acceleration, flexibility and dependability are known and respected the world over.

No car, regardless of price, surpasses it in quality or completeness of equipment.

If a smaller manufacturer or assembler were to build the Big-Six—of equal quality and workmanship—his price would be $3,500 — perhaps more.

But Big-Six overhead is distributed over six times as many units as are built by any Big-Six competitor, hence Big-Six cost and selling price are surprisingly low.

Don't buy blindfolded. Examine, ride in and drive the Big-Six before you buy any other car.

FORD JEWEL THEFT REMAINS UNSOLVED

STILL UNABLE TO OBTAIN CLUES TO $100,000 BURGLARY, CHIEF FOX SAYS.

FINGERPRINTS YIELD NO RESULT

Insurance Company Posts Reward of $5,000 For Return of the Jewels.

Detroit—No progress has been made by the police in their investigation of the Edsel Ford $100,000 jewel robbery. No one is under suspicion and the early recovery of the gems is not expected, according to Edward H. Fox, chief of detectives.

Fingerprints, which have been the sole clue obtained by the police, failed to be of any tangible aid. A comparison of the prints found on the door, window and the bureau from which the jewels were taken and the prints of the servants employed in the Ford household brought to light no new information, he said.

Whether the robbery was committed from the inside or whether it was the work of a skilled "second-story" worker, the police are likewise unable to say. Practically no trace of the burglar's entrance and exit have been discovered, while an explanation of how he succeeded in eluding the four guards continually on duty at the Ford home is still as deep a mystery as ever.

A reward of $5,000 has been offered by an insurance company which had issued a policy on the jewels. A special operative of the insurance company will work with the detectives on the case, Fox said.

The theft of the jewel case occurred between the hours of 10:30 p. m. and midnight, it is thought, while Mr. and Mrs. Ford were entertaining guests. Among the missing articles are a pearl necklace valued at $67,000, another worth $27,000, Mrs. Ford's platinum wedding ring, and a lady's guard ring set with a diamond. The thief also took a gold clock which stood on the dresser beside the jewel cases.

The thief overlooked another jewel case, which, had he taken it, would have added $10,000 to the value of his haul. The case overlooked by the thief contained two valuable rings, one of them Mrs. Ford's engagement ring. This case stood on the dresser beside the other jewel case which the thief took.

SEEKING CASH FOR TAX REFUND

Permission Asked To Use Other Funds To Pay Rebates Due.

Washington — The treasury has asked Comptroller General McCarl whether it may use funds appropriated for other tax refunds in rebating to those who remitted their full income taxes in advance of the action of congress in reducing this year's taxes by 25 per cent. Under-Secretary Winston announced that 1,058,000 persons had paid their taxes in full, aggregating $16,000,000.

The treasury through the budget requested an appropriation to cover these funds but it died in the closing jam of congress. In previous appropriations it has received $117,000,000 to be used this year in making tax refunds. About $30,000,000 of this total remains in the hands of the internal revenue commissioner, awaiting final audit of claims on returns of other years.

It is proposed, in the event permission is granted by the comptroller general, to begin the use of the available $30,000,000 in refunding the current year's over payments and to treat the other refunds as they arise until the fund is exhausted, when another appropriation will be required.

NOTED FLIER GETS NEW THRILL

MacReady Leaps from Plane at Night When Motor Goes Dead.

Dayton, O.—Lieut. John A. MacReady, veteran army flier, added the most thrilling chapter to the story of his exploits in the air. He has flown across the continent in a day. He has ascended to a height of more than 34,000 feet and come down stiff as an automaton from the intense cold.

Recently, he crawled out on the wing of his airplane, the motor of which had gone dead, jumped and pulled the rip cord of his parachute, and started down through 3,400 feet of absolute blackness.

He landed safely without injury, not far from where his plane crashed to the ground and was consumed in a sheet of flames, caused by explosion of the gas.

Canada Lost Immigrants to U. S.

Washington—Canada suffered a net loss of 20,000 immigrants to the United States in the last year, in spite of the Dominion government's vigorous campaign to stimulate homesteading and this country's restriction policy. During the year, 148,000 persons immigrated to Canada from the United States, Great Britain and continental countries. In the same period 200,000 aliens and Canadians came from that country to settle permanently in the United States.

Lace and Ostrich Compete in the Millinery Field

Competing with ostrich in the millinery field is lace. The two combine in this charming model. Covering the crown with lace as the picture shows, is one way of emphasizing its vogue. That a shoulder-trim of ostrich converts a small-brimmed shape into a truly picture hat is demonstrated in this pretty midsummer chapeau.

Father Sage Says:

"When a new married couple hez had their fust baby fer about six months, they ginerally come to this conclusion: thet they wouldn't sell the kid for a millyun dollars, an' wouldn't give five cents fer another un' like it."

Time Signals

The average error in the time signal sent by the naval observatory is less than three-one-hundredths of a second.

NIGHT RAIDERS STORM KENTUCKY

"RIDERS" DESTROY CROPS WORTH THOUSANDS, GROWERS ARM TO OPPOSE.

WOMAN IS SHOT DOWN BY BAND

Raids Are Attempt to Force Farmers to Join Various Marketing Associations.

Glasgow, Ky.—Raiders of tobacco beds—called "night riders" in Kentucky—are making certain sections of western Kentucky hideous. To add to their raids, in which thousands of dollars worth of tobacco plant beds have been ruined, a gang of the night marauders has shot a woman.

Metcalfe county has been the scene of the most recent outbreaks, although other counties in the same section have suffered. Scores of farmers have armed themselves and declare they will shoot on sight any men they see approaching their plant beds with apparent intent to destroy them.

In some cases the raiders have fired volleys from their weapons while tearing up the plant beds, adding to the terror in which some of the growers hold them. So far none of the sufferers has shot any of the raiders. The state government has taken no action, although Governor Augustus E. Willson, during the extensive "tobacco war," of 17 years ago, offered a free and full pardon to any man who killed a night rider. The raids stopped soon after Willson's pronouncamento.

Several stories are told of the attack on Mrs. Kidd. One is that a band of night riders halted in front of the Kidd home and called for Mr. Kidd. Mrs. Kidd, however, went to the door and was fired upon immediately. Another version is that she was shot while attempting to close the kitchen door of her home against the intruders. Mrs. Kidd was wounded by shotgun fire, a physician said.

According to word from that area, the plan of the raiders seems to be to force the tobacco growers menaced to join a co-operative association, and while some of the victims have not been members of such an association, members of the pool itself have had their beds destroyed. Officials of all pooling concerns have called on their members to do nothing against the law, to help keep the law and order and that, if growers do not see fit to become members of pools, that is their own affairs, although all have been invited.

STATE FIGHTS INSANITY PLEA

Illinois Officials Build Proof to Convict Leopold and Loeb.

Chicago—Alarmed by the "insanity defense" being built up to save Nathan Leopold and Richard Loeb from the gallows, the state's attorney's office has taken definite steps to tear down the insanity barrier.

More than a dozen friends and associates of the two young intellectuals, who murdered 14-year-old Robert Frank, "just for tthe fun of it," were notified to appear for questioning. They will be quizzed concerning the habits of Leopold and Loeb, in the hope they can establish the sanity of the youthful slayers.

An increasing number of alienists, called in by Clarence Darrow, chief counsel for the defense, are examining the two boys in the county jail. An array of sensitive instruments, used in testing mental activities is constantly being used in the examination.

The trial, expected to be greatest contest of its kind in Illinois court records, is to open August 4.

JAPAN DEMANDS DEATHS PROBE

Mysterious Slaying of 3 Nippons Stirs Tokio to Action.

Los Angeles—Complete investigation of the mysterious deaths of three Japanese which have baffled Los Angeles authorities is demanded by the Japanese government, through U. Oyama, Japanese consul general at San Francisco.

The shot-riddled bodies of two Japanese were found on a lonely seashore road close to Port MacArthur fortifications and the mangled corpse of a third Japanese was discovered beneath a bridge near Pasadena.

Police said robbery was not the motive in any of the killings. Five large diamond rings were found on one of the men, believed to be K. Ignarashi, Los Angeles cafe owner formerly residing in Chicago. Watches and money were found in the clothes of the others, all well dressed.

To Test Water Motorists Use.

Harrisburg, Pa.—Analysis of drinking water along state highways has been begun by officials of the State Department of Health. An ambulance converted into a field laboratory took to the road at the extreme eastern end of the Lincoln Highway opening the movement designed to protect the health of motorists who use wayside drinking water. As soon as the tests are made, the results will be sent field engineers who will post the drinking places.

LOST MOTION

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

I needed a little information at Providence, and as there was a young woman ahead of me, I had both time and opportunity to watch the young man in charge of the booth. All his actions were slow and deliberate. He had no nerves, apparently, and no appreciation of the fact that anyone might be pressed for time. He did nothing with directness. He would dip his pen into an ink bottle out of sight somewhere under the desk and then shake it once or twice in the direction of the floor to remove the surplus ink and wave it in the air before beginning to write. Constantly he was stopping to turn something over or to push something aside in search of a lost notation of some sort. He would open a drawer and then shut it, he would wander off to some remote and hidden part of the office for a blotter or a writing pad, or some esoteric fact of which he seemed to be in need; he would hesitate in his work and look up as some one passed, and all this as time was passing. His task was simply to copy a name and a number and a date in the paper he was making out—a task that he could have accomplished in one-tenth of the time it took him had he gone directly at it.

Most of his activity was merely lost motion; it was a little flourish before he began really to do anything; it had little or no connection with the main task in hand. As a worker he was worth about fifteen cents an hour, and he caused me nearly to miss an engagement.

His method is not an uncommon one. Any one who watched McCarter at his books would see that he studied in this same way. Most of the time that he was supposed to be studying, he was filling his fountain pen, or he was looking for his pipe or asking irrelevant questions of his roommate. He talked or sang snatches of the latest song or dozed over his book. There was no concentration, no getting directly at the point. Most of his mental activity, if it could be so called, was lost motion; most of his time was wasted.

Men tackle moral problems in much the same way. They edge round them, they evade a definite issue, they play with moral principles as the man in Providence played with the materials on his desk. They get nowhere, because they have no definite objective in view. Their moral activities are mostly lost motion.

Odd Experience

While shopping in my home town, writes a correspondent of the Chicago Journal, I was suddenly caught in the arms of an old lady who cried, "Edna, Edna, why did you leave John? Come back to him. John, here's Edna," she screamed. John took me in his arms and tried to kiss me. I hid my face. The clerks had known me for years, and came to my rescue. They were hard to convince that I was not Edna, but after looking me over carefully they left with puzzled looks on their faces.

John of Leyden

In 1534 Johann Bockelson, popularly called John of Leyden, established the kingdom of Zion in the city of Muenster, Westphalia, Germany, and had himself crowned king. His fanaticism finally brought him imprisonment and death.

The Ideal State

Education and good morals will be found to be almost the whole that goes to make a good man, and the same things will make a good statesman and a good king. The truest definition of a complete citizen that can be given is probably this: That he shares in the judicial and executive part of the government. A state, consisting of a multitude of human beings, ought to be brought to unity and community by education.

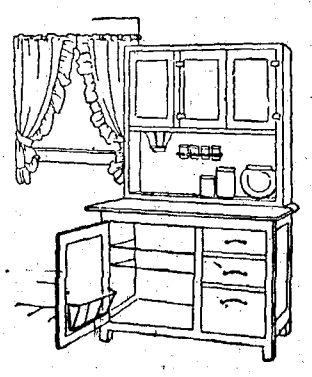

Mercy for Friend and Foe

As freely as the firmament embraces the world, or the sun pours forth impartially his beams, so mercy must encircle both friend and foe.—Schiller.

If Rotten Underneath

Neither a reputation nor a fence can be strengthened by whitewash.—Boston Transcript.

Nature Is Your Guardian

HEALTH TALK NO. 17

Nature at every moment of your existence is standing by your side, a silent guardian of your body. But you must not ignore Nature or treat her disdainfully. You must give her an opportunity to work unhindered in your body. The brain is the great generator of the nerve energy, which is the basis of body function. This nerve energy is the current which is sent over the nerve cables to the various organs, tissues and cells of the body that makes them function. When you turn off the electric light switch you do not expect the light to burn. Do you think you have any more right to expect your organs to function right when the nerve energy is turned off? If nature can get her forces from the brain to the various organs, tissues and cells of the body, health will result.

Chiropractic above anything else is in harmony with nature. Its principles are so simple that even a child can understand. It is but natural that every effect must have a cause, disease is but the effect of the cause, the cause is very easily corrected when once one knows what to do and how to do it. The Chiropractor pays no attention to the effect of the cause, but confines his work to locating the cause, adjusts it, thus giving nature the unobstructed right-of-way to the diseased tissues, the result is health.
